**Abstract of EP1099570**

The picture carrier (3) has the appearance of a surface of a natural building material. The covering (1) is transparent and of glass. The carrier (3) is of paper on which a picture is printed. To form the fixed connection between the covering and the carrier, a first transparent resin layer (2) is applied. A second resin layer (4) is applied to the opposite side of the carrier to the first layer.
